

Executive Summary – Security Overview

April 6, 2026

Overview

TalEval and Discovery Pro are designed exclusively for use by a limited user population within Dental Hygiene and Cosmetology educational programs with a goal to deem student competency before graduation and to ensure the program meets accreditation standards while doing so.

Cloud-Based Out of State Software Model

- TalEval and Discovery Pro are web-based applications.
- Software is hosted in a secure, professionally managed data center environment.
- Access is provided via standard internet browsers (no local installation required).
- No software is installed on school computers or servers.
- ASC does not operate or maintain equipment at customer locations.
- ASC is headquartered in South Carolina.

Third-Party Hosting & Infrastructure

America's Software Corporation (ASC) utilizes a trusted third-party hosting provider, Liquid Web LLC, to deliver secure and reliable cloud services.

Infrastructure Provider Responsibilities (Liquid Web LLC):

- Operation of secure, enterprise-grade data centers.
- Physical security, environmental controls, and power redundancy.
- Network infrastructure including firewalls and monitoring systems.
- Server hardware, storage systems, and virtualization infrastructure.
- Infrastructure-level patching, maintenance, and uptime monitoring.

Compliance & SOC Reporting

- Our data center infrastructure is operated by Liquid Web LLC, which maintains industry-standard compliance practices, including SOC reporting for its environment.
- America's Software Corporation does not operate its own data center and therefore does not maintain a separate SOC report.

Standard Agreement Structure

All customers operate under a **standard Terms and Conditions agreement**. We maintain a standard Terms and Conditions agreement, supplemented by a Government Addendum that addresses applicable legal and regulatory requirements for public sector entities.

- This ensures:
 - Consistency across institutions.
 - Efficient support and software updates.
 - Equal treatment of all schools.

Data & Security

- Customer data remains the property of the customer.
- Data is hosted in secure, professionally managed data center environments.
- Industry-standard safeguards are implemented to protect data confidentiality and integrity.
- Access to data is restricted through authenticated user accounts and role-based permissions.
- The system is designed to eliminate the collection of sensitive personal information.

Foreign Business Registration Policy

America's Software Corporation (ASC) is a South Carolina corporation providing remotely hosted software services to educational institutions throughout the United States.

ASC does not register as a foreign corporation, obtain state business licenses, maintain registered agents, or establish business locations in states where it has limited business activity.
