

TalEval and Discovery Pro System Architecture

America's Software Corporation

Secure | Dedicated Server | Web-Based | No Local Installation Required

DATA OVERVIEW

TalEval and Discovery Pro are designed to minimize the collection of sensitive personal information. Schools control which fields are used based on their institutional requirements.

KEY POINTS

- Hosted on a dedicated physical server in a Liquid Web data center.
- Not part of a shared or virtualized cloud hosting environment.
- Accessible via standard web browsers.
- No local installation required on school computers or servers.
- Regular backups and system monitoring ensure availability and data protection.

THIRD-PARTY HOSTING PROVIDER

Liquid Web™

America's Software Corporation utilizes **Liquid Web LLC** as its third-party managed hosting and data center provider. Liquid Web is responsible for the physical security of the data center, network infrastructure, server hardware, environmental controls, and hardware maintenance.
